Re: Docket No. GMCB-010-15con, Proposed Ambulatory Surgical Center

Dear Eileen:

Thank you for the responses to our questions to date. To complete the review of your application, responses are required for the following questions:

Electronic Medical Record

1. Explain whether HL7 custom interfaces will be needed and if so specify the name, cost and timeline for implementation and whether these costs are included in the CON total project cost.
2. Explain whether there are third party systems that will require integration (*i.e.* pharmacy) and if so, specify the name, cost and license terms and whether these costs are included in the CON total project cost.
3. Explain whether any hardware or other third party software was specified by Amaki but not included in its quote. If additional hardware or software is required, provide the name, cost, license and warranty and whether these costs are included in the CON total project cost.
4. Explain whether you will use Professional Services Implementation. If yes, identify in detail all costs associated with travel and materials for onsite training and whether those costs are included in the CON total project cost.
5. Provide the brand, cost, and warranty of the hardware that will be purchased to support this mission critical system. Identify who will support the EHR mission critical reliability, annual cost for such resources, and full-time equivalent (FTE) cost by labor category. Explain whether these costs are reflected in the CON total project cost.

6. Provide the type, quantity, brand, cost and warranty of hardware (including laptops, mobile devices, medical devices, x-ray screens, etc.) that GMSC will purchase for its staff. Provide the total cost of these items and identify where these costs are reflected in the CON total project cost.
7. Identify the hosting service to be used, subscription costs, and details of the contract up to and beyond the contract with AmakiSolutions. Explain whether the hosting meets FISMA high requirements for PII and PHI data. Explain whether these costs are reflected in the CON total project cost.
8. Explain whether there is third party software or hardware requiring integration with the proposed system. For physicians migrating patients to GMSC, explain the process and plan to integrate existing patient records with this new system. Identify the associated costs and whether those costs are reflected in the CON total project cost.

If you have any questions, please do not hesitate to contact me at 802-828-2918. In responding to these questions, please restate the question in bold font and respond in unbolded font, and send the original and two hard copies with a Verification Under Oath to me at the Green Mountain Care Board, 89 Main Street, Montpelier, Vermont 05620. Please send the electronic copy to donna.jerry@vermont.gov.

Sincerely,

s/ Donna Jerry
