

Fletcher Allen Hospital - Energy Action Plan (2014)

Purpose: To reduce operational cost savings, improve building comfort & performance, improve patient experience, be an effective steward of resources, and reduce our environmental impact.

Current: FY13 electricity cost: **\$ 10,856,035** FY13 fuel cost: **\$3,328,814**
 FY13 kWh consumption: **39,169,200** FY13 ccf consumption: **2,384,766**

Goals: Reduce our overall energy load at the Medical Center Campus and Fanny Allen by 1,000,000 kWh and 150,000 ccf

Team: Wes Pooler, Peter Irving, Aaron Fay, Tom Ellis, Jake Yanulavich (BED), Ray Keller (VGS)

Submitted by: Wes Pooler, Director of Facilities Management

Action Plan FY14 & FY15		Completed Efforts FY13 & FY14						
		Project Description	Date	Proj. Costs	Incentives	Savings	kWh Reduce	ccf Reduce
1. Chiller Plant Optimization		Burner Replacement-Boiler #5	Apr13	\$ 120,313	\$ 23,800	\$ 35,800		93,241
- Evaluate adding a 4th cooling tower cell		McClure Air Handler Unit	Jun13	\$ 630,000	\$ 200,275	\$ 118,009	835,977	
- Evaluate cooling tower fans/VFD		McClure Cog Belt Replacement	Sep13	\$ 19,817	\$ 10,582	\$ 15,582	141,092	
- Upgrade sequence of operations in the chilled water system		Steam Trap Replacement	May14	\$ 114,000		\$ 48,318		125,844
- Upgrade chiller controls		MCHV LED Fixtures	Feb14	\$ 40,000	\$ 20,000	\$ 28,000	79,000	
2. Boiler Plant Optimization		Roadway/Parking Lot LED Upgrade	Aug14	\$ 104,977	\$ 26,250	\$ 25,431	44,796	
- Replace combustion management controls		Hallway Lighting Upgrade		\$ 20,000	\$ 11,000	\$ 3,118	27,557	
- Replace steam traps		Baird AHU and Coil Upgrade	Jun14	\$ 531,500	\$ 30,000	\$ 38,808	73,402	6107
- Tune dampers		Baird roof replacement (bulding env)	Jun14	\$ 579,469	\$ 3,350			
3. Building Envelope Improvements		<p style="text-align: right;">Totals: \$ 2,160,076 \$ 325,257 \$ 313,066 1,201,824 225,192</p> <p style="text-align: center;">Total Energy Use per Square-Foot</p>						
- Replace Baird Building Roof								
- Replace Shepardson North Roof								
- Replace Engineering Building Roof								
- Replace windows and doors where necessary and feasible								
- Replace MRI roof								
4. Lighting Upgrades								
- Upgrade interior lighting to LED technology								
- Upgrade exterior lighting to LED technology								
5. Lighting Controls / Energy Management System Upgrades								
- Evaluate opportunities for improved lighting controls								
- Evaluate and institute off-hours setbacks on HVAC systems								
6. Building Management System Upgrade								
- Evaluate and program system controls to maximize efficiencies								
7. Upgrade or optimize HVAC systems								
- Fletcher Building HVAC upgrade								
- McClure Building Upgrade								
- Remove Baird 1 & 2 electric heat								
- Upgrade the Baird Air System, including the addition of 2 ERU's								
- Evaluate night setbacks in the ACC building								
8. Operating Efficiencies								
- Coil cleaning								
- Filter changes								
- Evaluate UV technology for air systems
