

Vermont All-Payer ACO Model
Vermont Medicare ACO Initiative Participation Agreement
Amendment to Section XIII.C, Appendix B, and Appendix K.

2020 Amendment No. 1

This amendment is made to the Vermont Medicare ACO Initiative Participation Agreement (the “Agreement”) between the CENTERS FOR MEDICARE & MEDICAID SERVICES (“CMS”) and OneCare Vermont ACO, LLC, an accountable care organization (“ACO”).

The United States is responding to an outbreak of a respiratory disease caused by a novel coronavirus, referred to as “coronavirus disease 2019” (“COVID-19”), which creates serious public health threats that have greatly impacted the U.S. health care system, presenting significant challenges for the health care community. On January 31, 2020, the Secretary of Health and Human Services declared a public health emergency (“PHE”) for the United States, retroactively effective from January 27, 2020, to aid the nation’s health care community in responding to COVID-19. CMS wishes to incorporate certain flexibilities into the Agreement to enable the ACO and its Initiative Participants and Preferred Providers to respond to the serious public health threats posed by the spread of COVID-19.

While the severity of illness among Beneficiaries with COVID-19 varies greatly, in many cases, the disease presentation is quite severe, resulting in significant utilization of health care resources. This is particularly true for COVID-19 cases that result in an inpatient admission. This increased utilization was not contemplated in designing the methodology for calculating Shared Savings and Shared Losses, as set forth in the Agreement. In particular, the localized nature of outbreaks and the increased utilization of acute care occurring during PY 2020 and the associated costs are not reflected in the ACO’s Performance Year Benchmark for PY2020. Accordingly, CMS wishes to amend the Agreement to remove payment amounts for episodes of care for treatment of COVID-19 from the accrued expenditures used to calculate Shared Savings and Shared Losses for PY 2020 and to apply a retrospective trend in calculating the Performance Year Benchmark for PY 2020. Moreover, in light of the unexpected and unprecedented scope of the PHE, CMS wishes to amend the Agreement to incorporate an extreme and uncontrollable circumstances policy to adjust the Shared Losses calculation for PY 2020 based on the duration of the extreme and uncontrollable circumstance and the percentage of Initiative Beneficiaries who reside in an affected area. And, because the PHE will affect the ACO’s performance on each of the quality measures for PY2020, CMS further wishes to amend the Agreement to change th all of the quality measures for PY2020 from pay-for-performance (“P”) to pay-for-reporting (“R”) Finally, CMS wishes to change the designation of certain quality measures from pay-for-performance (“P”) to pay-for-reporting (“R”) for PY2019 because the pandemic has interefered with CMS’s ability to verify those measures during calendar year 2020.

The parties therefore agree to amend the Agreement as set forth herein:

1. **Effective Date.** Unless otherwise specified, this amendment shall be effective when it is signed by the last party to sign it (as indicated by the date associated with that party's signature).
2. **Effect of Amendment.** All other terms and conditions of the Agreement shall remain in full force and effect. In the event of any inconsistency between the provisions of this amendment and the provisions of the Agreement, the provisions of this amendment shall prevail.
3. **Appendix B - Initiative Beneficiary Alignment and Benchmarking Methods.** Appendix B of the Agreement is hereby stricken in its entirety and replaced with the Appendix B included as Attachment A to this amendment.
4. **Appendix K - Quality Measures.** Appendix K of the Agreement is hereby stricken in its entirety and replaced with the Appendix K included as Attachment B to this amendment.

The signatory for the ACO certifies that he or she is authorized by the ACO to execute this amendment and to legally bind the ACO. Each party is signing this amendment on the date stated opposite that party's signature. If a party signs but fails to date a signature, the date that the other party receives the signing party's signature will be deemed to be the date that the signing party signed this amendment.

**Vermont All-Payer ACO Model
Vermont Medicare ACO Initiative**

Appendix B - Beneficiary Alignment and Benchmarking Methods

Part 1: Beneficiary Alignment and Benchmarking Methods for Performance Year 2019

This Part 1 of Appendix B describes the methodologies for Beneficiary alignment conducted pursuant to Section V of this Agreement, the Performance Year Benchmark calculated pursuant to Section XII of this Agreement, and financial settlement of Shared Savings and Shared Losses conducted pursuant to Section XIII.C of this Agreement for Performance Year 2019.

I. Definitions

“**ACO Service Area**” means all counties in the State of Vermont and counties outside the State of Vermont in which Initiative Professionals who are Primary Care Specialists have office locations.

“**Aligned Beneficiary**” means a Beneficiary aligned to the ACO for a Performance Year pursuant to Section V.A of this Agreement and Section II of this Appendix B.

“**Alignment-Eligible Beneficiary**” means a Beneficiary who, for a Base Year or a Performance Year, as applicable:

- Is covered under Part A in every month of the Base Year or the Performance Year, as applicable;
- Has no months of coverage under only Part A;
- Has no months of coverage under a Medicare Advantage or other Medicare managed care plan;
- Has no months in which Medicare was the secondary payer; and
- Was a resident of the United States in every month of the Base Year or the Performance Year, as applicable.

“**Base Year Alignment Period**” means the 2-year period ending six months prior to the first day of the Base Year for which Beneficiary alignment is being performed.

“**Base Year Beneficiary**” means an Alignment-Eligible Beneficiary who is aligned to the ACO for a given Base Year using the methodology set forth in Section II of this Appendix B.

“**Entitlement Category**” means one of the following two entitlement categories of Beneficiaries:

- 1) Aged and Disabled (A/D) Beneficiaries (Beneficiaries eligible for Medicare by age or disability) who are not End-Stage Renal Disease (ESRD) Beneficiaries (“**A/D Beneficiaries**”); or

- 2) ESRD Beneficiaries (Beneficiaries eligible for Medicare on the basis of an ESRD diagnosis) (“**ESRD Beneficiaries**”).¹

“**Performance Year Alignment Period**” means the 2-year period ending six months prior to the first day of the Performance Year for which Beneficiary alignment is being performed.

“**Primary Care Specialist**” means a physician or non-physician practitioner (NPP) whose principal specialty is listed in Table 1.3 of this Appendix B.

“**Non-Primary Care Specialist**” means a physician or NPP whose principal specialty is listed in Table 1.4 of this Appendix B.

“**QEM Services**” means Qualified Evaluation & Management (QEM) services identified by the Healthcare Common Procedure Coding System (HCPCS) codes listed in Table 1.2 of this Appendix B.

II. Beneficiary Alignment Methodology

A. General

Beneficiaries are aligned to the ACO for each Performance Year on the basis of each Beneficiary’s receipt of QEM Services from an Initiative Professional during the Performance Year Alignment Period using the alignment algorithm described in Section II.C of this Appendix. Beneficiaries are similarly aligned to the ACO for each Base Year on the basis of each Beneficiary’s receipt of QEM Services from an Initiative Professional during the Base Year Alignment Period using the alignment algorithm described in Section II.C of this Appendix.

B. Alignment Years

The Performance Year Alignment Period and the Base Year Alignment Period each consist of two alignment years (each an “**Alignment Year**”). The first such Alignment Year is the 12-month period ending 18 months prior to the start of the Performance Year or Base Year, as applicable. The second such Alignment Year is the 12-month period ending 6 months prior to the start of the Performance Year or Base Year, as applicable.

In this Appendix B, an Alignment Year is identified by the calendar year in which the Alignment Year ends. Table 1.1 of this Appendix B specifies the period covered by each Base Year and each Performance Year, and their corresponding Alignment Years.

¹ ESRD status in a month is determined based on Medicare enrollment/eligibility files not dialysis claims. A Beneficiary’s experience accrues to the ESRD Entitlement Category if, during a month, the Beneficiary was receiving maintenance dialysis for kidney failure or was in the 3-month period starting in the month when a kidney transplant was performed.

C. Alignment Algorithm

Alignment of a Beneficiary is determined by comparing, for the Performance Year Alignment Period or the Base Year Alignment Period, as applicable:

1. The weighted allowable charge for all QEM Services that the Beneficiary received from an Initiative Professional included on the Participant List for the relevant Performance Year; and
2. The weighted allowable charge for all QEM Services that the Beneficiary received from a provider or supplier not included on the Participant List for the relevant Performance Year.

Alignment is determined for Performance Year 2019 using the initial Participant List described in Section IV.B.4 of the Agreement for Performance Year 2019 and, for each subsequent Performance Year, the final Participant List described in Section IV.E.4(g) of the Agreement for the applicable Performance Year. As set forth in Section V.A.2 of the Agreement, CMS may, in its sole discretion, adjust the alignment of Initiative Beneficiaries to the ACO for a Performance Year due to the addition or removal of an Initiative Participant from the Participant List during the Performance Year pursuant to Section IV.D or Section XVIII.A of the Agreement.

To determine the weighted allowable charge, the allowable charge on every paid claim for QEM Services received by a Beneficiary during the two Alignment Years that comprise the Base Year Alignment Period or the Performance Year Alignment Period, as applicable, will be weighted as follows:

1. The allowable charge for QEM Services provided during the first (i.e., earlier) of the two Alignment Years will be weighted by a factor of $\frac{1}{3}$.
2. The allowable charge for QEM Services provided during the second (i.e., later or more recent) of the two Alignment Years will be weighted by a factor of $\frac{2}{3}$.

Only those claims for QEM Services that are identified as being furnished by Primary Care Specialists or, if applicable, Non-Primary Care Specialists will be used in Beneficiary alignment determinations. Specifically:

1. Beneficiary Alignment based on QEM Services furnished by Primary Care Specialists
If 10% or more of the weighted allowable charges are for QEM Services furnished by Primary Care Specialists, then Beneficiary alignment is based on the weighted allowable charges for QEM Services furnished by Primary Care Specialists.
2. Beneficiary Alignment based on QEM Services furnished by Non-Primary Care Specialists
If less than 10% of the weighted allowable charges are for QEM Services furnished by Primary Care Specialists, then Beneficiary alignment is based on the weighted allowable charges for QEM Services furnished by Non-Primary Care Specialists.

A Beneficiary is aligned to the ACO for a Performance Year if the Beneficiary received the plurality of QEM Services during the applicable Performance Year Alignment Period from an Initiative Professional included on the Participant List for that Performance Year.

A Beneficiary is aligned to the ACO for a Base Year if the Beneficiary received the plurality of QEM Services during the applicable Base Year Alignment Period from an Initiative Professional included on the Participant List for the relevant Performance Year.

In the case of a tie in the dollar amount of the weighted allowable charges for QEM Services furnished to a Beneficiary by two or more providers or suppliers, the Beneficiary will be aligned to the provider or supplier from whom the Beneficiary most recently obtained a QEM Service.

D. Initiative Beneficiary Population

Alignment-eligibility of Aligned Beneficiaries will be determined each quarter of a Performance Year based on whether an Aligned Beneficiary satisfies the definition of an Alignment-Eligible Beneficiary for each month of the applicable quarter. During the quarterly identification of Alignment-Eligible Beneficiaries, CMS will also identify Aligned Beneficiaries who have died during the applicable quarter.

For purposes of the financial settlement of Shared Savings and Shared Losses, as described in Section IV.C of this Appendix, CMS includes only the following:

1. for Aligned Beneficiaries who were Alignment-Eligible Beneficiaries for each month of the Performance Year, person-months and expenditures for the full Performance Year; and
2. for Aligned Beneficiaries who died during the Performance Year but were Alignment-Eligible Beneficiaries for each month of the Performance Year prior to death, person-months and expenditures for each month they were alive during the Performance Year.

III. Performance Year Benchmark Methodology

A. Overview

The Performance Year Benchmark is set prospectively for each Performance Year prior to the start of the Performance Year, as described below. The Performance Year Benchmark is determined using included Base Year expenditures for each of the two Entitlement Categories, subject to certain exclusions, and subject to the application of a trend factor and adjustments for quality performance. As stated in Section XII.B of the Agreement, a Performance Year Benchmark may be retroactively modified if CMS determines that exogenous factors during the relevant Performance Year render the data used in calculating the Performance Year

Benchmark inaccurate or inappropriate for purposes of assessing the expected level of spending between the Base Year and Performance Year.

B. Role of the Green Mountain Care Board

The GMCB will prospectively develop the Performance Year Benchmark for the ACO in accordance with the standards set forth in the State Agreement and this Appendix B. Prior to the start of the Performance Year for which the Performance Year Benchmark will apply, the GMCB will submit to CMS for approval the proposed Performance Year Benchmark for the ACO. CMS will assess the Performance Year Benchmark to ensure consistency with the standards set forth in the State Agreement and will decide, in its sole discretion, whether to approve or disapprove the Performance Year Benchmark submitted by the GMCB. If CMS disapproves the GMCB's submission for the Performance Year Benchmark, CMS will work with the GMCB to revise the submission to be consistent with the standards set forth in the State Agreement and this Appendix B. Prior to the start of each Performance Year, GMCB will provide the ACO with the CMS-approved Performance Year Benchmark and CMS will provide the ACO with a Performance Year Benchmark Report (as defined in Section XII.A.2 of this Agreement) setting forth the calculation of the ACO's CMS-approved Performance Year Benchmark.

C. Performance Year Benchmark Components

The ACO's Performance Year Benchmark is determined using the Base Year Expenditures for each of the two Entitlement Categories, subject to the application of a trend factor. The total Base Year Expenditure is the sum of the following two amounts:

1. The trended Base Year expenditure for A/D Beneficiaries who are Base Year Beneficiaries, multiplied by the person-months accrued to the A/D Entitlement Category by Base Year Beneficiaries during the Base Year; and
2. The trended Base Year expenditure for ESRD Beneficiaries who are Base Year Beneficiaries, multiplied by the person-months accrued to the ESRD Entitlement Category by Base Year Beneficiaries during the Base Year.

This can be expressed as a per-Beneficiary per-month expenditure by dividing the total Base Year expenditure by the total number of person-months accrued during the Base Year by Base Year Beneficiaries. For a Base Year Beneficiary who dies during a Base Year, this calculation includes person-months and expenditures only for those months of the Base Year that the Base Year Beneficiary was alive. At the time of financial settlement, this amount is then subject to an adjustment based on the ACO's quality performance. The three components of the Performance Year Benchmark calculation are discussed in more detail below.

1. Included and Excluded Base Year Expenditures for Base Year Beneficiaries.

For purposes of calculating the Performance Year Benchmark, the expenditure incurred by a Base Year Beneficiary is the sum of all Medicare claims paid to providers and suppliers:

1. For services covered by Medicare Parts A and/or B;
2. With a date of service during the Base Year; and
3. That are paid within 3 months of the close of the Base Year. The paid date for a claim is the date the claim is loaded into the Integrated Data Repository (IDR).

Indirect Medical Education (IME) and the empirically justified Medicare Disproportionate Share Hospital (DSH) payments are included expenditures for purposes of the calculation of the Performance Year Benchmark.

The following claims are excluded from expenditures for purposes of calculating the Performance Year Benchmark:

- A. Payments for services provided to identifiable beneficiaries that are made outside the standard Part A and Part B claims systems; and
- B. Uncompensated Care (UCC) payments.

2. Trend factor applied to the Base Year expenditures for Base Year Beneficiaries

The trend factor is the projected growth rate applied to the Base Year expenditures for Base Year Beneficiaries to account for expected increases in per-Beneficiary expenditures for the upcoming Performance Year.

The Medicare FFS United States Per-Capita Cost (USPCC) projection will be used to calculate the trend factor for purposes of calculating the Performance Year Benchmark. Though historical USPCC projections are continuously updated (e.g., 2018-2019 USPCC projection is updated using the April 2019 projection release), USPCC projection calculations used to calculate each Performance Year Benchmark under this Agreement will not be retroactively updated.

For example, for the Performance Year 2019 Performance Year Benchmark, the trend factor will be calculated by dividing the USPCC Parts A&B current estimate for CY2019 by the USPCC Parts A&B current estimate for CY2018.

3. Quality Measures and Quality Score

Appendix K of this Agreement describes quality measures used to assess quality performance. The prospective Performance Year Benchmark will be calculated based on a preliminary quality score of 100%, to be adjusted during financial settlement to reflect the ACO's actual quality performance.

During financial settlement, CMS will apply a downward adjustment to the ACO's Performance Year Benchmark in an amount of up to 0.5% of the Performance Year expenditure calculated in accordance with Section IV of this Appendix B, depending on the ACO's actual quality performance. The amount of any downward adjustment will be based on the ACO's actual quality score for the Performance Year, with a higher quality score resulting in a smaller downward adjustment. If the ACO receives an actual quality score of 100%, the ACO will not receive a downward adjustment to its Performance Year Benchmark.

IV. Financial Settlement

A. Overview

Following the end of each Performance Year, and at such other times as may be required under this Agreement, CMS will issue a financial settlement report to the ACO setting forth the amount of any Shared Savings or Shared Losses, the amount of Other Monies Owed by CMS or the ACO, and the net amount owed by either CMS or the ACO. The methodology used for purposes of the financial settlement of Shared Savings and Shared Losses is described below.

B. Initiative Beneficiaries for Financial Settlement

As described in Section I.E of this Appendix, for purposes of the financial settlement of Shared Savings and Shared Losses, CMS includes only the following:

1. for Aligned Beneficiaries who were Alignment-Eligible Beneficiaries for each month of the Performance Year, person-months and expenditures for the full Performance Year; and
2. for Aligned Beneficiaries who died during the Performance Year but were Alignment-Eligible Beneficiaries for each month of the Performance Year prior to death, person-months and expenditures for each month they were alive during the Performance Year.

For purposes of financial settlement of Shared Savings and Shared Losses, Beneficiaries will also be excluded from the population of Initiative Beneficiaries retroactive to the start of the Performance Year if, during the Performance Year, at least 50% of QEM Services received by the Beneficiary were furnished by providers or suppliers practicing outside the ACO Service Area.

C. Performance Year Expenditures

For purposes of conducting financial settlement pursuant to Section VIII.C of the Agreement, expenditures will be calculated separately for each of the two Entitlement Categories: ESRD Beneficiaries and A/D Beneficiaries. CMS will apply the same inclusions and exclusions in determining the Performance Year expenditures as those described in Section III.C of this Appendix with respect to determining the Base Year expenditures for purposes of the

calculation of the Performance Year Benchmark, except that only Medicare claims with a date of service during the Performance Year and that are paid within 3 months of the close of the Performance Year will be included.

The total Performance Year expenditure is the sum of the following two amounts:

1. The Performance Year expenditure for A/D Beneficiaries who are Initiative Beneficiaries multiplied by the person-months accrued to the A/D Entitlement Category by Initiative Beneficiaries during the Performance Year; and
2. The Performance Year expenditure for ESRD Beneficiaries who are Initiative Beneficiaries multiplied by the person-months accrued to the ESRD Entitlement Category by Initiative Beneficiaries during the Performance Year.

This can be expressed as a per-Beneficiary per-month expenditure by dividing the total Performance Year expenditure by the total number of person-months accrued during the Performance Year by Initiative Beneficiaries.²

D. Savings/Losses Amount

The ACO's aggregate gross savings or losses will be determined by subtracting the Performance Year expenditure calculated in accordance with Section IV.C of this Appendix from the ACO's Performance Year Benchmark calculated in accordance with Section III of this Appendix.

The Risk Arrangement selected by the ACO in accordance with Section X.A of the Agreement will determine the portion of the aggregate gross savings or losses in relation to the Performance Year Benchmark that accrue to the ACO as Shared Savings or Shared Losses. The Initiative offers two Risk Arrangements:

1. Risk Arrangement A: 80% Shared Savings/Shared Losses, ACO selects a Savings/Losses Cap between 5%-15%.
2. Risk Arrangement B: 100% Shared Savings/Shared Losses, ACO selects a Savings/Losses Cap between 5%-15%.

The Savings/Losses Cap is the maximum allowable percentage of the ACO's Performance Year Benchmark that will be paid to the ACO as Shared Savings or owed by the ACO as Shared Losses, subject to the application of the Risk Arrangement selected by the ACO. For example, if the ACO selects a 5% Savings/Losses Cap and a 100% Risk Arrangement, the ACO would only share in savings up to 5% of its Performance Year Benchmark, even if it achieved savings

² The combined benchmark is, therefore, simply the person-month weighted average of the Aged/Disabled and ESRD PBPM benchmarks.

equal to 6% of that Performance Year Benchmark. In instances in which aggregate gross ACO savings/losses exceed the Savings/Losses Cap selected by the ACO, the Savings/Losses Cap is first applied to determine the maximum allowable savings/losses, and the Risk Arrangement is then applied to that maximum allowable savings/loss amount. For example, if the ACO selects a 5% Savings/Losses Cap and a 80% Risk Arrangement, the ACO would share in savings/losses up to 4% [80% of the 5% maximum allowable savings/losses] of its Performance Year Benchmark.

Budget sequestration will apply to the calculation of Shared Savings, but will not apply to the calculation of Shared Losses. For example, if the budget sequestration rate is 2%, the amount of Shared Savings owed to the ACO would be 98% of any savings calculated after application of the Savings/Losses Cap and the Risk Arrangement as described above, but the amount of Shared Losses owed by the ACO would be 100% of any losses calculated after application of the Savings/Losses Cap and the Risk Arrangement as described above.

Part 2: Beneficiary Alignment and Benchmarking Methods Beginning Performance Year 2020

This Part 2 of Appendix B describes the methodologies for Beneficiary alignment conducted pursuant to Section V of this Agreement, the Performance Year Benchmark calculated pursuant to Section XII of this Agreement, and financial settlement of Shared Savings and Shared Losses conducted pursuant to Section XIII.C of this Agreement for Performance Year 2020 and subsequent Performance Years.

I. Definitions

“**ACO Service Area**” means all counties in the State of Vermont and counties outside the State of Vermont in which Initiative Professionals who are Primary Care Specialists have office locations.

“**Aligned Beneficiary**” means a Beneficiary aligned to the ACO for a Performance Year pursuant to Section V.A of this Agreement and Section II of this Appendix B.

“**Alignment-Eligible Beneficiary**” means a Beneficiary who, for a Base Year or a Performance Year, as applicable:

- Is covered under Part A in every month of the Base Year or the Performance Year, as applicable;
- Has no months of coverage under only Part A;
- Has no months of coverage under a Medicare Advantage or other Medicare managed care plan;
- Has no months in which Medicare was the secondary payer; and
- Was a resident of the United States in every month of the Base Year or the Performance Year, as applicable.

“**Base Year Alignment Period**” means the 2-year period ending six months prior to the first day of the Base Year for which Beneficiary alignment is being performed.

“**Base Year Beneficiary**” means an Alignment-Eligible Beneficiary who is aligned to the ACO for a given Base Year using the methodology set forth in Section II of this Appendix B.

“**Entitlement Category**” means one of the following two entitlement categories of Beneficiaries:

- 1) Aged and Disabled (A/D) Beneficiaries (Beneficiaries eligible for Medicare by age or disability) who are not End-Stage Renal Disease (ESRD) Beneficiaries (“**A/D Beneficiaries**”); or

- 2) ESRD Beneficiaries (Beneficiaries eligible for Medicare on the basis of an ESRD diagnosis) (“**ESRD Beneficiaries**”).³

“**Performance Year Alignment Period**” means the 2-year period ending six months prior to the first day of the Performance Year for which Beneficiary alignment is being performed.

“**Primary Care Specialist**” means a physician or non-physician practitioner (NPP) whose principal specialty is listed in Table 1.3 of this Appendix B.

“**Non-Primary Care Specialist**” means a physician or NPP whose principal specialty is listed in Table 1.4 of this Appendix B.

“**QEM Services**” means Qualified Evaluation & Management (QEM) services identified by the Healthcare Common Procedure Coding System (HCPCS) codes listed in Table 1.2 of this Appendix B.

II. Beneficiary Alignment Methodology

A. General

Beneficiaries are aligned to the ACO for each Performance Year on the basis of each Beneficiary’s receipt of QEM Services from an Initiative Professional during the Performance Year Alignment Period using the alignment algorithm described in Section II.C of this Appendix. Beneficiaries are similarly aligned to the ACO for each Base Year on the basis of each Beneficiary’s receipt of QEM Services from an Initiative Professional during the Base Year Alignment Period using the alignment algorithm described in Section II.C of this Appendix.

B. Alignment Years

The Performance Year Alignment Period and the Base Year Alignment Period each consist of two alignment years (each an “**Alignment Year**”). The first such Alignment Year is the 12-month period ending 18 months prior to the start of the Performance Year or Base Year, as applicable. The second such Alignment Year is the 12-month period ending 6 months prior to the start of the Performance Year or Base Year, as applicable.

In this Appendix B, an Alignment Year is identified by the calendar year in which the Alignment Year ends. Table 1.1 of this Appendix B specifies the period covered by each Base Year and each Performance Year, and their corresponding Alignment Years.

³ ESRD status in a month is determined based on Medicare enrollment/eligibility files not dialysis claims. A Beneficiary’s experience accrues to the ESRD Entitlement Category if, during a month, the Beneficiary was receiving maintenance dialysis for kidney failure or was in the 3-month period starting in the month when a kidney transplant was performed.

C. Alignment Algorithm

Alignment of a Beneficiary is determined by comparing, for the Performance Year Alignment Period or the Base Year Alignment Period, as applicable:

1. The weighted allowable charge for all QEM Services that the Beneficiary received from an Initiative Professional included on the Participant List for the relevant Performance Year; and
2. The weighted allowable charge for all QEM Services that the Beneficiary received from a provider or supplier not included on the Participant List for the relevant Performance Year.

Alignment is determined for Performance Year 2019 using the initial Participant List described in Section IV.B.4 of the Agreement for Performance Year 2019 and, for each subsequent Performance Year, the final Participant List described in Section IV.E.4(g) of the Agreement for the applicable Performance Year. As set forth in Section V.A.2 of the Agreement, CMS may, in its sole discretion, adjust the alignment of Initiative Beneficiaries to the ACO for a Performance Year due to the addition or removal of an Initiative Participant from the Participant List during the Performance Year pursuant to Section IV.D or Section XVIII.A of the Agreement.

To determine the weighted allowable charge, the allowable charge on every paid claim for QEM Services received by a Beneficiary during the two Alignment Years that comprise the Base Year Alignment Period or the Performance Year Alignment Period, as applicable, will be weighted as follows:

1. The allowable charge for QEM Services provided during the first (i.e., earlier) of the two Alignment Years will be weighted by a factor of $\frac{1}{3}$.
2. The allowable charge for QEM Services provided during the second (i.e., later or more recent) of the two Alignment Years will be weighted by a factor of $\frac{2}{3}$.

Only those claims for QEM Services that are identified as being furnished by Primary Care Specialists or, if applicable, Non-Primary Care Specialists will be used in Beneficiary alignment determinations. Specifically:

1. Beneficiary Alignment based on QEM Services furnished by Primary Care Specialists
If 10% or more of the weighted allowable charges are for QEM Services furnished by Primary Care Specialists, then Beneficiary alignment is based on the weighted allowable charges for QEM Services furnished by Primary Care Specialists.
2. Beneficiary Alignment based on QEM Services furnished by Non-Primary Care Specialists
If less than 10% of the weighted allowable charges are for QEM Services furnished by Primary Care Specialists, then Beneficiary alignment is based on the weighted allowable charges for QEM Services furnished by Non-Primary Care Specialists.

A Beneficiary is aligned to the ACO for a Performance Year if the Beneficiary received the plurality of QEM Services during the applicable Performance Year Alignment Period from an Initiative Professional included on the Participant List for that Performance Year.

A Beneficiary is aligned to the ACO for a Base Year if the Beneficiary received the plurality of QEM Services during the applicable Base Year Alignment Period from an Initiative Professional included on the Participant List for the relevant Performance Year.

In the case of a tie in the dollar amount of the weighted allowable charges for QEM Services furnished to a Beneficiary by two or more providers or suppliers, the Beneficiary will be aligned to the provider or supplier from whom the Beneficiary most recently obtained a QEM Service.

D. Initiative Beneficiary Population

Alignment-eligibility of Aligned Beneficiaries will be determined each quarter of a Performance Year based on whether an Aligned Beneficiary satisfies the definition of an Alignment-Eligible Beneficiary for each month of the applicable quarter. During the quarterly identification of Alignment-Eligible Beneficiaries, CMS will also identify Aligned Beneficiaries who have died during the applicable quarter.

For purposes of the financial settlement of Shared Savings and Shared Losses, as described in Section IV.C of this Appendix, CMS includes only the following:

1. for Aligned Beneficiaries who were Alignment-Eligible Beneficiaries for each month of the Performance Year, person-months and expenditures for the full Performance Year; and
2. for Aligned Beneficiaries who died during the Performance Year but were Alignment-Eligible Beneficiaries for each month of the Performance Year prior to death, person-months and expenditures for each month they were alive during the Performance Year.

III. Calculation of Performance Year Benchmark

A. Overview

The Performance Year Benchmark is set prospectively for each Performance Year prior to the start of the Performance Year. The Performance Year Benchmark is determined by the GMCB, as described in Section III.B of this Appendix B, using included historical expenditures for each of the two Entitlement Categories, subject to certain exclusions, and subject to the application of a trend factor and adjustments for quality performance. CMS will provide the GMCB with the Base Year expenditures for the applicable Base Year for use as a reference point in the GMCB's Performance Year Benchmark methodology; however such Base Year expenditures will not be materially used by the GMCB in the calculation of the Performance Year Benchmark for Performance Year 2020 or subsequent Performance Years. As stated in

Section XII.B of the Agreement, a Performance Year Benchmark may be retroactively modified if CMS determines that exogenous factors during the relevant Performance Year render the data used in calculating the Performance Year Benchmark inaccurate or inappropriate for purposes of assessing the expected level of spending between the period used by the GMCB to calculate the historical expenditures included in the Performance Year Benchmark methodology and the Performance Year.

B. Role of the Green Mountain Care Board and Calculation of the Performance Year Benchmark

The GMCB will prospectively develop the Performance Year Benchmark for the ACO in accordance with the standards set forth in the State Agreement and this Agreement. Prior to the start of the Performance Year for which the Performance Year Benchmark will apply, the GMCB will submit to CMS for approval the proposed Performance Year Benchmark for the ACO. CMS will assess the Performance Year Benchmark to ensure consistency with the standards set forth in the State Agreement and will decide, in its sole discretion, whether to approve or disapprove the Performance Year Benchmark submitted by the GMCB. If CMS disapproves the GMCB's submission for the Performance Year Benchmark, CMS will work with the GMCB to revise the submission to be consistent with the standards set forth in the State Agreement and this Appendix B. Prior to the start of each Performance Year, GMCB will provide the ACO with a report setting forth the CMS-approved Performance Year Benchmark and the methodology used to calculate the ACO's CMS-approved Performance Year Benchmark.

For Performance Year 2020, the GMCB will replace the trend factor used in calculating the Performance Year Benchmark with a regional retrospective trend. The regional retrospective trend will be equal to the growth rate in per-Beneficiary Medicare FFS expenditures for Vermont Alignment-Eligible Beneficiaries between calendar year 2019 and calendar year 2020. The GMCB will determine the regional retrospective trend following the end of Performance Year 2020.

IV. Financial Settlement

A. Overview

Following the end of each Performance Year, and at such other times as may be required under this Agreement, CMS will issue a financial settlement report to the ACO setting forth the amount of any Shared Savings or Shared Losses, the amount of Other Monies Owed by CMS or the ACO, and the net amount owed by either CMS or the ACO. The methodology used for purposes of the financial settlement of Shared Savings and Shared Losses is described below.

B. Initiative Beneficiaries for Financial Settlement

As described in Section IV.E of this Appendix, for purposes of the financial settlement of Shared Savings and Shared Losses, CMS includes only the following:

3. for Aligned Beneficiaries who were Alignment-Eligible Beneficiaries for each month of the Performance Year, person-months and expenditures for the full Performance Year; and
4. for Aligned Beneficiaries who died during the Performance Year but were Alignment-Eligible Beneficiaries for each month of the Performance Year prior to death, person-months and expenditures for each month they were alive during the Performance Year.

For purposes of financial settlement of Shared Savings and Shared Losses, Beneficiaries will also be excluded from the population of Initiative Beneficiaries retroactive to the start of the Performance Year if, during the Performance Year, at least 50% of QEM Services received by the Beneficiary were furnished by providers or suppliers practicing outside the ACO Service Area.

C. Performance Year Expenditures

For purposes of conducting financial settlement pursuant to Section XIII.C of the Agreement, expenditures will be calculated separately for each of the two Entitlement Categories: ESRD Beneficiaries and A/D Beneficiaries. CMS will apply inclusions and exclusions in determining the Performance Year expenditures as described in Section IV.C.1 of this Appendix for Medicare claims with a date of service during the Performance Year and that are paid within 6 months of the close of the Performance Year. CMS may, at CMS's sole discretion, modify the inclusions and exclusions used in determining the Performance Year expenditures as needed for consistency with the GMCB's Performance Year Benchmark methodology for purposes of conducting financial settlement.

The total Performance Year expenditure is the sum of the following two amounts:

3. The Performance Year expenditure for A/D Beneficiaries who are Initiative Beneficiaries multiplied by the person-months accrued to the A/D Entitlement Category by Initiative Beneficiaries during the Performance Year; and
4. The Performance Year expenditure for ESRD Beneficiaries who are Initiative Beneficiaries multiplied by the person-months accrued to the ESRD Entitlement Category by Initiative Beneficiaries during the Performance Year.

This can be expressed as a per-Beneficiary per-month expenditure by dividing the total Performance Year expenditure by the total number of person-months accrued during the Performance Year by Initiative Beneficiaries.

1. **Included and Excluded Expenditures for Initiative Beneficiaries.**

For purposes of calculating the Performance Year expenditures, the expenditure incurred by a Initiative Beneficiary is the sum of all Medicare claims paid to providers and suppliers:

- A. For services covered by Medicare Parts A and/or B;
- B. With a date of service during the Performance Year; and
- C. That are paid within 6 months of the close of the Performance Year. The paid date for a claim is the date the claim is loaded into the Integrated Data Repository (IDR).

Indirect Medical Education (IME) and the empirically justified Medicare Disproportionate Share Hospital (DSH) payments are included expenditures for purposes of the calculation of the Performance Year expenditures.

The following claims are excluded from expenditures for purposes of calculating the Performance Year expenditures:

- C. Payments for services provided to identifiable beneficiaries that are made outside the standard Part A and Part B claims systems;
- D. Uncompensated Care (UCC) payments; and
- E. Payment for outlier cases.

CMS will exclude from the Performance Year expenditures calculations for the Performance Year all Parts A and B payment amounts for an episode of care for treatment of COVID-19, as specified on Parts A and B claims with dates of service during the episode. All Parts A and B payment amounts with dates of service during the months in a COVID-19 episode of care will be removed from Performance Year expenditure calculations. CMS will identify an episode of care for treatment of COVID-19, based on the criteria specified in 42 C.F.R. § 425.611(b)(1). Episodes of care for treatment of COVID-19 will be triggered by an inpatient admission for acute care either at an acute care hospital or other healthcare facility, which may include temporary expansion sites, Medicare-enrolled ambulatory surgical centers (ASCs) providing hospital services to help address the urgent need to increase hospital capacity to treat COVID-19 patients, CAHs, and potentially other types of providers. CMS will define the episode of care as starting in the month in which the inpatient stay begins as identified by the admission date, all months during the inpatient stay, and the month following the end of the inpatient stay as indicated by the discharge date.

D. Quality Measures and Quality Score

Appendix K of this Agreement describes quality measures used to assess quality performance. The Performance Year Benchmark will be calculated based on a preliminary quality score of

100%, to be adjusted during financial settlement to reflect the ACO's actual quality performance.

During financial settlement, CMS will apply a downward adjustment to the ACO's Performance Year Benchmark in an amount of up to 0.5% of the Performance Year expenditure calculated in accordance with Section IV of this Appendix B, depending on the ACO's actual quality performance. The amount of any downward adjustment will be based on the ACO's actual quality score for the Performance Year, with a higher quality score resulting in a smaller downward adjustment. If the ACO receives an actual quality score of 100%, the ACO will not receive a downward adjustment to its Performance Year Benchmark during financial settlement.

E. Savings/Losses Amount

The ACO's aggregate gross savings or losses will be determined by subtracting the Performance Year expenditure calculated in accordance with Section IV.C of this Appendix from the ACO's Performance Year Benchmark calculated in accordance with Section III of this Appendix.

The Risk Arrangement selected by the ACO in accordance with Section X.A of the Agreement will determine the portion of the aggregate gross savings or losses in relation to the Performance Year Benchmark that accrue to the ACO as Shared Savings or Shared Losses. The Initiative offers two Risk Arrangements:

3. Risk Arrangement A: 80% Shared Savings/Shared Losses, ACO selects a Savings/Losses Cap between 5%-15%.
4. Risk Arrangement B: 100% Shared Savings/Shared Losses, ACO selects a Savings/Losses Cap between 5%-15%.

The Savings/Losses Cap is the maximum allowable percentage of the ACO's Performance Year Benchmark that will be paid to the ACO as Shared Savings or owed by the ACO as Shared Losses, subject to the application of the Risk Arrangement selected by the ACO. For example, if the ACO selects a 5% Savings/Losses Cap and a 100% Risk Arrangement, the ACO would only share in savings up to 5% of its Performance Year Benchmark, even if it achieved savings equal to 6% of that Performance Year Benchmark. In instances in which aggregate gross ACO savings/losses exceed the Savings/Losses Cap selected by the ACO, the Savings/Losses Cap is first applied to determine the maximum allowable savings/losses, and the Risk Arrangement is then applied to that maximum allowable savings/loss amount. For example, if the ACO selects a 5% Savings/Losses Cap and a 80% Risk Arrangement, the ACO would share in savings/losses up to 4% [80% of the 5% maximum allowable savings/losses] of its Performance Year Benchmark.

Budget sequestration will apply to the calculation of Shared Savings, but will not apply to the calculation of Shared Losses. For example, if the budget sequestration rate is 2%, the amount of

Shared Savings owed to the ACO would be 98% of any savings calculated after application of the Savings/Losses Cap and the Risk Arrangement as described above, but the amount of Shared Losses owed by the ACO would be 100% of any losses calculated after application of the Savings/Losses Cap and the Risk Arrangement as described above.

After the application of the ACO’s selected Risk Arrangement, the Shared Losses, if any, will be reduced prior to recoupment by an amount determined by multiplying the Shared Losses by the percentage of total months during the Performance Year affected by an extreme and uncontrollable circumstance, such as the Public Health Emergency (PHE) for the COVID-19 pandemic as defined in 42 C.F.R. § 400.200, and the percentage of Initiative Beneficiaries who reside in an area affected by the extreme and uncontrollable circumstance. CMS applies determinations made under the Quality Payment Program with respect to whether an extreme and uncontrollable circumstance has occurred and the affected areas. [CMS](#) has sole discretion to determine the time period during which an extreme and uncontrollable circumstance occurred and the percentage of the ACO's Initiative Beneficiaries residing in the affected areas.

V. Tables

Table 1.1 - Period Covered by Each Base Year and Performance Year and Corresponding Alignment Years

Period	Period covered¹	Corresponding Alignment Years (AYs)
Base Year	<u>PY2019</u> Base Year: 01/01/2018 – 12/31/2018	AY1: 07/01/2015 – 06/30/2016 (AY2016) AY2: 07/01/2016 – 06/30/2017 (AY2017)

ATTACHMENT B

**Vermont All-Payer ACO Model
Vermont Medicare ACO Initiative
Appendix K - Quality Measures**

The following quality measures are the measures for use in establishing quality performance standards for the first Performance Year of the Initiative (CY2019).

	ACO Measure #	Measure Title	Method of Data Submission	Pay for Performance Status R—Reporting; P—Performance
Access to Care	ACO – 1	CAHPS: Getting Timely Care, Appointments, and Information	Survey	P
	ACO – 2	CAHPS: How Well Your Providers Communicate	Survey	P
	ACO – 3	CAHPS: Patients' Rating of Provider	Survey	P
	ACO – 4	CAHPS: Access to Specialists	Survey	P
	ACO – 5	CAHPS: Health Promotion and Education	Survey	P
	ACO – 6	CAHPS: Shared Decision Making	Survey	P
	ACO – 7	CAHPS: Health Status/Functional Status	Survey	R
	ACO – 34	CAHPS: Stewardship of Patient Resources	Survey	R
	ACO-45	CAHPS: Courteous and Helpful Office Staff	Survey	R
	ACO-46	CAHPS: Care Coordination	Survey	R
Reduce Deaths Due to Drug Overdose and Suicide	ACO – 18	Preventive Care and Screening: Screening for Depression and Follow-up Plan	EFT via ACO-OS	R
	VT – 1*	Follow-up after Discharge from the Emergency Department for Mental Health or Alcohol or Other Drug Dependence (30-day)	Claims	R
	VT – 2*	Initiation and Engagement of Alcohol and Other Drug Dependence Treatment	Claims	R
Reduce Prevalence of Chronic Disease for COPD, Hypertension, Diabetes	ACO - 27	Diabetes Hemoglobin (HbA1c) Poor Control (>9%)	EFT via ACO-OS	R
	ACO - 28	Hypertension: Controlling High Blood Pressure	EFT via ACO-OS	R
	ACO - 38	Risk-Standardized, Acute Admission Rate for Patients with Multiple Chronic Conditions	Claims	P
	ACO – 17	Preventive Care and Screening: Tobacco Use: Screening and Cessation Intervention	EFT via ACO-OS	R
Care Coordination/Patient Safety	ACO – 8	Risk-Standardized, All Condition Readmission	Claims	P
Preventive Health	ACO – 14	Preventive Care and Screening: Influenza Immunization	EFT via ACO-OS	R
	ACO – 19	Colorectal Cancer Screening	EFT via ACO-OS	R

*These measures are not included in the Medicare Shared Savings Program, Program Guidance and Specifications, Quality Resources and Information.

The following quality measures are the measures for use in establishing quality performance standards for the second Performance Year of the Initiative (CY2020).

	ACO Measure #	Measure Title	Method of Data Submission	Pay for Performance Status R—Reporting; P—Performance
Access to Care	ACO – 1	CAHPS: Getting Timely Care, Appointments, and Information	Survey	R
	ACO – 2	CAHPS: How Well Your Providers Communicate	Survey	R
	ACO – 3	CAHPS: Patients' Rating of Provider	Survey	R
	ACO – 4	CAHPS: Access to Specialists	Survey	R
	ACO – 5	CAHPS: Health Promotion and Education	Survey	R
	ACO – 6	CAHPS: Shared Decision Making	Survey	R
	ACO – 7	CAHPS: Health Status/Functional Status	Survey	R
	ACO – 34	CAHPS: Stewardship of Patient Resources	Survey	R
	ACO-45	CAHPS: Courteous and Helpful Office Staff	Survey	R
	ACO-46	CAHPS: Care Coordination	Survey	R
Reduce Deaths Due to Drug Overdose and Suicide	ACO – 18	Preventive Care and Screening: Screening for Depression and Follow-up Plan	EFT via ACO-OS	R
	VT – 1*	Follow-up after Discharge from the Emergency Department for Mental Health or Alcohol or Other Drug Dependence (30-day)	Claims	R
	VT – 2*	Initiation and Engagement of Alcohol and Other Drug Dependence Treatment	Claims	R
Reduce Prevalence of Chronic Disease for COPD, Hypertension, Diabetes	ACO - 27	Diabetes Hemoglobin (HbA1c) Poor Control (>9%)	EFT via ACO-OS	R
	ACO - 28	Hypertension: Controlling High Blood Pressure	EFT via ACO-OS	R
	ACO - 38	Risk-Standardized, Acute Admission Rate for Patients with Multiple Chronic Conditions	Claims	R
	ACO – 17	Preventive Care and Screening: Tobacco Use: Screening and Cessation Intervention	EFT via ACO-OS	R
Care Coordination/Patient Safety	ACO – 8	Risk-Standardized, All Condition Readmission	Claims	R
Preventive Health	ACO – 14	Preventive Care and Screening: Influenza Immunization	EFT via ACO-OS	R
	ACO – 19	Colorectal Cancer Screening	EFT via ACO-OS	R

*These measures are not included in the Medicare Shared Savings Program, Program Guidance and Specifications, Quality Resources and Information.
