Re: Docket No. GMCB-004-23con, Development of Outpatient Surgery Center on Tilley Drive, Project Cost: \$129,640,703.

Dear Ms. Jerry:

The University of Vermont Medical Center Inc. ("UVM Medical Center") hereby respond to the Green Mountain Care Board's ("Board") Requests for Additional Information Q.001, dated February 23, 2023, regarding the above-referenced project.

1. Please submit the CSI estimate format prepared by a Construction Manager of a professional estimating company.

Response: Please see the attached estimate.

2. FGI Check List: Item 2.7-2 Accommodations for care of patients of size. Explain how patients of size seeking care at the Outpatient Surgery Center (OSC) will be accommodated.

Response:

The OSC will meet or exceed all requirements of the federal Americans with Disabilities Act, as well as all federal, state, and municipal building code requirements related to public accessibility. The public entrance to the OSC will feature power operated doors; all of its waiting area spaces and furniture, as well as the patient-accessible bathroom fixtures, will accommodate all patients and family members. Clinically, the OSC will support patients with ASA risk score of 3 or below and patients with Body Mass Index (BMI) of 50 or less. These guidelines, developed by the Department of Anesthesiology to support patient safety and high quality care at the Fanny Allen, will continue to the new OSC. Before opening the new OSC, a multidisciplinary team,

including respiratory therapy, pulmonology, surgery, anesthesiology, and nursing will develop a protocolized approach to patient selection, based on patient safety, for the OSC patients with BMI between 40 - 50. UVM Medical Center will continue to accommodate patients of higher risk for surgery, including patients with BMI > 50, in its main campus operating rooms, which are equipped with the expanded-capacity lifts and other features that support all patients receiving surgical care in the inpatient setting, where the increased risks of surgery can be more safely and appropriately managed.

2.7-2	ACCOMMODATIONS FOR CARE OF PATIENTS OF SIZE
2.1-2.1.1.2	<input checked="" type="checkbox"/> check if <u>not</u> included in project (only if a Patient Handling & Movement Assessment that determines that the outpatient service does not have a need for expanded-capacity lifts & architectural details that support movement of patients of size in patient areas is attached to the Project Narrative)

3. FGI Item 2.1-3.8.8.2. Please check the box if four minimum air changes will be provided in the med prep room. If not, please explain in detail.

Response: Four (4) air changes per hour will be provided in the medication preparation room.

2.1-3.8.8.2			
(1)	<input checked="" type="checkbox"/> medication preparation room	Ventilation:	
(a)	<input checked="" type="checkbox"/> work counter	<input checked="" type="checkbox"/> Min. 4 air changes per hour	Table 8.1
	<input checked="" type="checkbox"/> handwashing station	Lighting:	
	<input checked="" type="checkbox"/> lockable refrigerator	<input checked="" type="checkbox"/> Task lighting	2.1-3.8.8.1(2)(d)
	<input checked="" type="checkbox"/> locked storage for controlled drugs		
	<input checked="" type="checkbox"/> sharps containers		
	<input type="checkbox"/> check if not included in project		
(b)	<input checked="" type="checkbox"/> self-contained medication dispensing units		
	<input type="checkbox"/> check if not included in project		
	<input checked="" type="checkbox"/> room designed with space to prepare medications		

4. FGI Item 2.7-6.4. Explain what alternative accommodations are being made for general support area staff storage.

Response: Each member of the OSC staff will be assigned a lockable storage locker to store personal belongings. Staff who are assigned a private office will also be able to secure personal belongings in their office. The workstations in general support areas are communal, and there is no need for additional dedicated staff storage in these areas.

2.7-6.4	GENERAL SUPPORT AREAS FOR STAFF
2.1-6.4.2	<input checked="" type="checkbox"/> Storage for staff personal effects
	<input checked="" type="checkbox"/> locking drawers cabinets or lockers
	<input checked="" type="checkbox"/> readily accessible* to individual work areas

5. Please provide the Financial Framework Model for the OSC project in Excel that UVMHC discussed during an earlier conference call with CON staff.

Response: Please see the relevant portions of UVM Health Network's "Five Year Financial Framework" for the UVM Medical Center attached hereto in both Excel and .pdf format.

The financial framework is a financial projection model that provides a five-year current and forward looking view, incorporating previous, current, and future years' projected operating results, investment returns, capital spend, and debt assumptions. The model is built in an integrated software solution, which leading health care consultant and financial advisor Kaufman Hall & Associates originally developed and still uses. It is refreshed annually, and also reviewed by UVM Health Network's health care financial advisor Ponder & Company to ensure objectives are reasonable compared to industry financial benchmarks.

The financial framework incorporates high level volume, payer, P&L and balance sheet relationships to model future year financial results and balance sheet impacts. It is used to project financial, operational, debt, and balance sheet statistics to test the reasonableness of UVM Health Network's multi-year capital plan, and define the financial performance results necessary to ensure financial stability. The financial framework also serves to inform external industry partners such as rating agencies, major banks, and investors of future debt insurance of the current and future financial health and credit worthiness of the UVM Health Network.

No single metric or statistic predicts or demonstrates future financial stability. Effective financial management requires a multi-year balanced and integrated approach, and an understanding of the relationship between key financial indicators. Those key financial indicators are Operating Margin, EBIDA Margin, Days Cash on Hand, Capital Spend %, Average Age of Plant, & Long-Term Debt to Capitalization Ratio.

UVM Medical Center focuses on achieving the annual margin results necessary to maintain the financial thresholds and relationships set by the financial framework. This focus on margin is necessary as many variables can affect financial results. Achieving margin results is one of the most critical components in ensuring the financial thresholds set by the multi-year financial framework can be met, and services to UVM Medical Center's patients can be maintained.

Finally, the financial framework is a planning tool constructed at a higher level of generality than the project-specific financial modeling the Board requires as part of UVM Medical Center's CON applications. In most cases, information contained in reports from the financial framework will be very similar to information contained in the financial tables submitted in support of a CON application, though not exactly the same. The financial framework does fairly convey the relational impact of the proposed OSC project on financial results, however, and therefore can be useful to inform the CON decision process.

Thank you for your attention to UVM Medical Center's application. Please let us know if you have any further questions or need additional information.

Sincerely,

A handwritten signature in blue ink, appearing to read "Eric Miller".

Eric Miller
Senior Vice President and General Counsel
The University of Vermont Health Network
