Note: These data are as of the Oct 2019 submission, Days cash on hand, reported as of May 2020 are over inflated and may give a false sense of risk across the system; Staff will recalculate once we receive more information on how hospitals account for COVID-related grants and loans.

# Provider Tax Analysis: Reasonability Assessment

Reasonability Assessment Graph

*The recalculation of provider tax was determined by applying the 6% provider tax rate to the FY2020 projected NPR/FPP, as submitted by the hospitals.*

*“This tax is calculated as 6% of the prior year net patient revenue. The significant reduction in net patient revenue that we have experienced in FY2020 will result in a lower tax in FY2021.”*
