

Change in Charge: Adjusting FY25 Requested Values

Note: The order of hospitals changes in various data sources, based on whether the alphabetical order is applied to the full name of the hospital or its abbreviation. Due to this, Grace Cottage Hospital (GCH) and Gifford Medical Center (GMC) had FY25 change in charge values reversed, as well as Springfield Hospital (SH) and Southwestern Vermont Medical Center (SVMC). These adjustments do not change the findings from previous years, and the updated graphs for these four hospitals are shown in the slides here.
