Quality Measures Results

Performance Year: 2023

Measure	Status	Benchmarks				Rate	Num	Den	Bonus Points	Quality Points
		25th	50th	75th	90th					
30 Day Follow-Up after Discharge from the ED for Substance Use	P	-	31.31	35.36	39.34	N/A	0	0	N/A	N/A
30 Day Follow-Up after Discharge from the ED for Mental Illness	P	-	63.72	70.27	76.60	33.33	1	3	N/A	N/A
Child and Adolescent Well-Care Visits	P	-	55.36	63.76	71.70	73.32	665	907	N/A	16.50
ACO All-Cause Readmissions	P	-	0.61	0.54	0.46	0.33	3	9	N/A	16.50
Follow-Up after Hospitalization for Mental Illness (7 Day Rate)	P	-	45.33	58.10	66.10	70.00	7	10	N/A	N/A
Diabetes Mellitus: Hemoglobin A1c Poor Control (>9%)	P	-	31.75	25.55	20.92	21.71	89	410	N/A	13.13
Hypertension: Controlling High Blood Pressure	P	-	64.30	70.20	75.10	66.67	274	411	N/A	8.25
Initiation & Engagement of Substance Use Disorder Treatment (Composite)	P	-	24.40	28.10	31.90	20.83	35	168	N/A	0.00
Colorectal Cancer Screening	P	-	55.34	59.37	65.69	58.74	2,056	3,500	N/A	8.25
CAHPS Patient Experience: Care Coordination Composite Score	R	-	-	-	-	N/A	N/A	N/A	N/A	N/A

Footnotes:

1. P - Payment Measure, R - Reporting Measure
2. ACO All-Cause Readmissions rate reflects an observed to expected ratio. The numerator is the number of readmissions observed and the denominator is the number of readmissions that were expected based on risk of the population.
3. ACO All-Cause Readmissions and Diabetes Mellitus: Hemoglobin A1c Poor Control (>9%) are inverse measures, lower rate indicates better performance.

Points Earned: 62.63

Total Possible Points: 100.00

Final Score: 62.63%

MVP QHP

Quality Measures Results

Performance Year: 2023

Information

1. Patient experience was evaluated using CAHPS Patient Centered Medical Home (PCMH) Annual Composite Survey
2. For those measures where less than 30 eligible patients were in the sample, points were redistributed amongst other claims and clinical based quality measures.
