Topic: non-allopathic and transparent health care

Comment: I am not versed in the new information, however will be unable to attend this round of meetings. One of the MAJOR things our health care leaves out is patient information. I'm supposed to have a test, and have made the calls for estimated costs - and was informed someone would call me within 5 working days. 9 days later, no call. I've cancelled my appt. until I find out if the cost to me is worth the information. We also fail to recognize and value the effectiveness of non-allopathic medicine such as chiropractic (now paid by medicare at a very low rate), acupuncture (Chinese Medicine) which we KNOW has proven results, and the use of other modalities. We undervalue supporting people BEFORE they have a medical crisis. The govt. is also participating in trying to convince me to buy a bad-for-me medicare advantage plan - and to receive vaccines that have caused me to have serious other health problems. We are not all the same, and we need to address the for-profit business of over vaccination and medications which carry such horrific side effects that a person is better off managing pain, digestion, and care through FUNCTIONAL MEDICINE. Also the denial of Tick Borne Diseases and the lack of understanding by the medical community is creating a health crisis that will last life times. Thank you.
