Topic: Hospital Budget

Comment: The state of Vermont has done no planning for the increased healthcare demands from the babyboomers, nore has it done much of anything in mental health since the loss of the Waterbury facility.. It is all left to the hospitals. They need a budget that can handle these pressures. Don't hamstring them. It will be your responsibility if things fail miserably. Please lobby for better reimbursement for primary care with less paperwork demands. Cut bureaucracy including yours instead of restricting hospital budgets.
