Topic: Vytalize

Comment: Like Medicare Advantage, in Traditional Medicare DCE'S under the REACH innovations CMS program makes a profit by upcoding risk scores for patients thereby making money because they get a higher dollar allocation for that patient than what the patient will cost them, and, via preauthorizations, denials and delays, will save money by forgoing treatment for patient who need it. The GMCB should reject Vytalize' s budget if its business model uses upcoding and preauthorizations as mechanism to make money from the Trust fund and at the expense of patient care.
