Comment: If we go back to the \$45 million SIM grant, this experiment has been ongoing for almost 10 years, with nothing, absolutely nothing to show for it. It has been imposed on the people of Vermont as the reason why nothing else can happen in terms of health care reform. And now Vermonters are told please wait another 5 years minimum...before they can see access or quality improve . Health care costs are killing Vermonters...literally...and OneCare has only made things worse.
