Accountable Care Organization

Comment

This comment is on Clover Health as a Direct Contracting Entity. This insurance company is apparently under investigation by the US Department of Justice. The company's business model is to use artificial intelligence in diagnostics and upcoding in order to extract profits from Medicare. At a time when Vermont's APM/ACO model is under scrutiny, it would be a grave error to open the door to yet another middleman, whose only goal is to steal profits from a public program.
