1. The Green Mountain Care Board must level-fund OneCare's population health management/mission investments back to 2020.
2. The Green Mountain Care Board must commensurately reduce total organization compensation — level-funded to 2020.
3. The Green Mountain Care Board must reduce total leadership compensation to national median levels.

It is utterly unconscionable to neglect the many for the benefit of a very very few WITH PUBLIC DOLLARS! How dare the state approve budgets like this?! It is shameful and is producing real harm to real people. My neighbors. Your neighbors. It is selfish and I have yet to see a good argument for why we continue to pay these salaries. Especially when we are concurrently reducing the actual benefits to Vermonters that might improve their long term health and wellness. Shame on us.
