

October 29, 2021

I am writing to urge your approval of the 2022 budget proposal for OneCare.

I have been a patient family advisor there for three years. I have learned of their success in reducing the financial costs created by the current payment arrangement. The cost per patient now may be augmented with unnecessary tests, specialist referrals and a dozen other treatment costs.

But you are aware of the bloated costs of health care.

Please keep the one entity that is proving there is a better way to continue its good work.

Thank you.

Sincerely,

Brian Harwood

South Burlington, VT
