Please accept this message of support for OneCare Vermont as the Green Mountain Care Board reviews their budget submission. Bayada Home Health Care is a mission driven, non-profit organization whose purpose is to help people have a safe home life with comfort, independence and dignity. Our performance is driven by the quality of our person and family centered care, analytics, as well as innovative delivery models. As an enthusiastic collaborator with OneCare since its inception, we work with many health systems in supporting innovative health reform across the United States. OneCare has fostered and supported Bayada's collaboration with community partners all over Vermont. This state-wide effort among healthcare providers has rapidly improved the care and the care options for Vermonters. We look forward to Green Mountain Care Board's continued support of OneCare.
