On or before September 15, the Board shall establish each hospital's budget for the next fiscal year. On or before October 1, the Board shall issue a written decision establishing each hospital's budget for the next fiscal year.

3.400 Enforcement

(a) The Board may conduct, at any time, an independent review of a hospital's performance under the budget established for it by the Board. This review shall take into consideration the following factors:

- (1) the variability of a hospital's actual revenues, taking into account the resources of payers and the methods of payment used by the payers;
- (2) the hospital's ability to limit services to meet its budget, consistent with its obligations to provide appropriate care for all patients;
- (3) the financial position of the hospital in relation to other hospitals and to the health care system as a whole, using the statistics developed from information submitted in compliance with the uniform reporting manual;
- (4) the hospital's performance under budgets identified or established under subchapter 7 of Chapter 221 of Title 18 of Vermont Statutes Annotated for the previous three years and its budget projections for the next three years; and
- (5) any other considerations deemed appropriate by the Board, including but not limited to other instances in which a hospital has less than full control over the expenditures limited by the budget.

(b) After making a determination of a hospital's performance under an established budget, the Board may adjust the hospital's budget, taking into account the factors set forth in subsection 3.400(a). Where a determination is made that a hospital's performance has differed substantially from its budget, the Board may adjust its budget by:

- (1) changing hospital rates or prices by the amount of net revenues exceeding the budgeted net revenues;
- (2) changing the net revenue and/or expenditure levels of future budgets;
- (3) allowing hospital rates to be increased for a hospital with a deficit caused by revenues that were less than projected, but whose actual expenditures were within the budget limits;
- (4) allowing a hospital to retain surplus funds if the surplus was achieved while the hospital stayed within its established budget;
- (5) allowing a hospital to retain a percentage of surplus generated primarily by volume in excess of that projected for a particular year; or
- (6) any other circumstance the Board deems appropriate.

(c) Adjustment methods based on past performance shall be applied by the Board in the course of establishing a new budget and may be imposed over a multiyear period. In recommending adjustment
